

An SBA Certified 8(a) Alaska Native Corporation (ANC)

Engineering superior mission outcomes

ENTERPRISE IT SERVICES

Driven by an ITIL framework of best practices, and certified in leading commercial enterprise system and application development tools, TUVA architects and engineers design, implement, automate, manage and monitor enterprise-level IT systems and services at our customer's most stringent operational standards. We employ a service delivery assurance methodology that keeps our customer's mission-critical systems at peak performance while capable of quickly accommodating change.

TUVA personnel integrate into your project teams and provide expertise to assist in managing project technical risk and make certain that designs are optimized for performance, availability, agility, cost control, security and desired project outcomes. And we work with these teams to improve system designs based on independent quality surveillance on test activities, safety review, security, reliability and quality, and observation of integration and test activities to ensure best practices. Fiercely focused on deliverables that ensure your desired mission outcomes, our Enterprise IT services include:

ABOUT TUVA

Enabling agile, flexible and more responsive government relations

Today's government and DoD environments are the most complex and demanding ever. And while they always required the secure and constant alignment of information technology with business goals, new requirements including WiFi, multimedia, Telepresence, BYOD, interagency policy development and federated enterprises have made IT and both cyber and security more interdependent than ever. It is this new environment—an environment that is driving the most critical operations at today's most forward looking agencies—that drives the daily work at TUVA. The result: We enable our customers better anticipate and manage change, reduce costs and become more agile and responsive to the organizations and citizens that they serve.

Contracting advantages

As an SBA certified 8(a) Alaskan Native Corporation (ANC), TUVA offers customers the following contract advantages:

- Direct negotiated contracts
- No award dollar limits*
- No award protest for sole-source contracts
- Simplified and accelerated procurements

*A J&A is required for sole source awards greater than \$22 million.
